Mountainbiking in Trysil

For almost 10 years, Trysil has worked with the development of organized mountainbiking. Today there are more than 50 km of built trails and bike parks. Everything is well marked and organized.

The bike map is good to have:

30 km of the built trails are located in the Gullia area at Turistsenteret.

Here there is trail biking for all levels. The trails are divided into colors according to degree

of difficulty. From easy and family-friendly green and blue, to red and black for the more experienced ones.

Two of Trysil's four bike parks are located in the area by Gullia; GT Bike Park and GT Pro Park. The other two bike parks are located at Radisson Blu Resort Trysil and at Høyfjellssenteret.

In addition, over 100 km of natural bike trails in and around Trysilfjellet have been marked. Mountainbiking is a popular activity throughout the municipality, and other parts of Trysil also have mountainbike trails.

If this is your first visit to Trysil and you want to bike, it is a good tip to start with Gullia

The climbing park Høyt & Lavt (high & low)

If you like heights, the climbing park at Turistsenteret is worth a visit. The park consists of nine climbing routes with zip-lines, nets, ropes and other fun elements.

The routes are graded with colors as in an alpine resort from easiest to most difficult: Orange, green, blue and red. In a climbing park, it is the height of the children that determines who gets to climb.

The height requirements for the slopes are:

Orange: over 80 cm.

Green: over 110 cm.

Red/blue: over 140 cm.

Shopping in Trysil city center

Trysil city center is not very large, but there is a nice mix of offers and shops.

Trysil has its own shopping centre, Trysilsenteret, with a good selection of shops, including several chain stores. The pharmacy and liquor store (vinmonopolet) are also located at Trysilsenteret.

Further down Trysil's main street, Storvegen, there are more shops and other services.

Excursions and car trips

Perhaps you would like to take a road trip somewhere during the time you visit Trysil. We have some recommendations:

Trysil is located on the Swedish border, and there are several interesting places to visit right on the other side.

Långfloen Shoppingcenter is a 30-minute drive from Trysil.

If you want to shop Swedish groceries, this is a perfectly fine place. The center has a well-stocked grocery store, its own candy store, café and a couple of other shops. Open every day from 8 am to 9 pm.

Sälen and Sälenfjellet offer a little more:

Drive eastwards, pass Østby and drive over the border at Gränsbo. Follow the signs to Sälen. You will eventually pass the new airport, Scandinavian Mountains Airport. Then you come to the mountain. Here is SkiStar Sälen with several sites in a row. After 1 hour's drive from Trysil, you will reach the town of Sälen. A small center with shops and cafes. You can then consider whether you want to drive on and visit places like Malung and Mora.

Femund Engerdal and Idre:

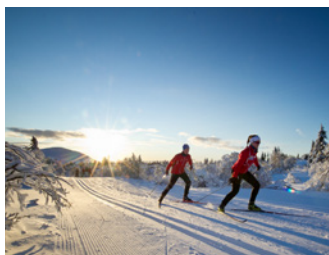

One hour north of Trysil is the

municipality of Engerdal with the destination Femund Engerdal. This area in itself is worth a visit. Lots of nature and wilderness with the national parks Femundsmarka and Gutulia and the lake Femunden. This region has many marked mountain hikes. More information: www.femundengerdal.no

From Drevsjø you can cross the border and follow the signs for Idre. Idre has shops, a liquor store, and not least Idrefjäll.

Fulufjellet National Park is a Norwegian-Swedish national park. There are several nice walking tours, and Storbekkåsen is the main port of entry on the Norwegian side. Here you can climb a great Sherpa staircase and follow the marked route to Brynflå. The yellow border piles testify that you can cross the border to Sweden. On the Swedish side, naturum Fulufjället is a nice place to visit. Here you can, among other things, visit Sweden's largest waterfall Njupeskår.

Bittermarka is a charming mountain village about 30 kilometers north of Trysil city center. Pass the church, follow the road straight ahead and you will eventually reach Bittermarka. This is a good starting point for mountain hikes, but it is also nice just to observe and enjoy the nature. And you just might get company! A fun attraction in the summer months are the 100 goats that live and eat in Bittermarka. The goats from the farm Bryn have Bittermarka as their summer residence. They are very social and like contact and cuddle. The farm Bryn is also a dairy and produces cheese. You can buy the cheese in their little farm shop.
